Professional Summary

Experienced and results-oriented Software Engineer with a strong background in developing scalable web applications, RESTful APIs, and cloud microservices. Proficient in Python, FastAPI, React, and cloud platforms. Passionate about writing clean, maintainable code and optimizing system performance.

Core Technical Skills

Programming Languages: Python, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks & Tools: FastAPI, React, Next.js, Node.js, SQLAlchemy, PostgreSQL, Docker, AWS (S3, EC2), Git

Work Experience

Senior Software Engineer | TechCorp Inc. (2022 - Present)

- Designed, developed, and maintained robust backend services using FastAPI and Python in a containerized Docker environment.
- Optimized database query speeds in PostgreSQL using indexing and eager loads, reducing API latency by 35%.
- Spearheaded integration of Google Cloud AI tools into the internal document analyzer services.

Software Developer | SoftSys Solutions (2020 - 2022)

- Built interactive client-facing web application dashboards using React, TypeScript, and CSS.
- Created clean RESTful APIs using Python Flask and integrated them with frontend user interfaces.

Education

B.S. in Computer Science | State University (2016 - 2020)

- Graduated with Honors. Co-founder of the Computer Science Student Club.

Key Projects

TaskFlow: A project tracking board built using React, FastAPI, Docker, and PostgreSQL. Features real-time state synchronization, user authentication, and data exporting.
